About the Course

Empower School of Health is delighted to introduce its Post Graduate Diploma in Data Management in Public Health Procurement & Supply Chain course. This is a comprehensive and specialized program designed to equip professionals with the essential skills to navigate the evolving landscape of data management in public health procurement and supply chain.

This Post Graduate Diploma is a 12-month online program that has been developed in collaboration with the United Nations Institute for Training and Research (UNITAR) and other partners such as The Medicines, Technologies, and Pharmaceutical Services (MTaPS), Chemonics and VillageReach.

The course has been meticulously designed to provide a holistic understanding of the subject matter. It is also affordable and accessible, catering especially to the needs of low- and middle-income countries.

A critical aspect addressed by the diploma is the lack of effective data management in the public health supply chain, a challenge and opportunity recognized globally. With data-driven decision-making paramount for those seeking to excel in understanding data, its collection and analysis, and its usage to enhance public health supply chain efficiency, transparency, and effectiveness, this postgraduate diploma program is indeed timely. The diploma equips participants with the knowledge to tackle these challenges head-on.

Embark on a transformative educational journey with us as we navigate through the evolving landscape of Data Management in public health procurement and supply chain operations.

INSTITUTIONAL
CERTIFICATION

Empower School of Health is proudly accredited by FIBAA for excellence in digital education, following European Standards and with over 25 years of expertise, FIBAA is recognized by Germany's Accreditation Council, Switzerland's HEdA, EQAR, and ENQA.

ACCREDITED

Empower holds premier accreditation from the Accreditation Service for International Schools, Colleges and Universities (ASIC), recognized by UKVI and a member of CIQG in the USA. It is listed in the International Directory and affiliated with BQF and EDEN. This accreditation signifies excellence in various areas of operation.

Program Highlights

- Focused on emerging **career opportunities** in the latest technological advancements
- **Three-month internship with UNITAR** (in Geneva or remote) for selected learners
- A **distinctive course** focused on Data Management in Procurement and Public Health Supply Chain
- Curriculum **designed by industry experts and senior academia** from across the globe
- **Live interactive sessions** with experienced subject matter experts
- **Latest information** and technical content, together with **proven systems approaches**
- **Research project focused on problem-solving**, applying the concepts taught in the course
- **Mentorship and on-the-job technical assistance** by Empower faculty and industry experts

Eligibility Criteria

Graduates with a recognized Bachelor's degree from any discipline, or working professionals interested in upskilling and career progression.

Core Modules

1. The Basics of Supply Chain Data Management
2. Procurement and Supply Chain Management for Medical Devices, Diagnostics And Equipment (MDDE)
3. Emergency, Pandemic, and Humanitarian Public Health Procurement and Supply Chain Management
4. Collecting Data in Public Health Procurement and Supply Chain
5. Analyzing Data in Public Health Procurement and Supply Chain
6. Using Data in Public Health Procurement and Supply Chain
7. Risk Management in Public Health Procurement and Supply Chain
8. Health Informatics and Data Standards
9. Policy and Governance in Public Health Procurement and Supply Chain
10. Leadership in Global Health
11. Dissertation

Why Choose This Course?

This course prepares you for the emerging world in data management, providing you with numerous growth opportunities in international NGOs, Ministries of Health, UN agencies, and donors' programs. Proficiency in data management in public health and supply chains can greatly enhance career progression by enabling informed decision-making, optimizing operations, and demonstrating expertise in critical areas of health logistics and management.

About us

Empower is a global health academic research and capacity-building institute focusing on empowering individuals and communities. Empower works with UN agencies, MoH, public health organizations, international NGOs and donor agencies across Africa, Asia, CIS and the Pacific on various global health projects. Empower has experience in more than 100 countries, 250+ organizations, with a diverse team of health professionals, designers and technology experts. Empower has a global presence and believes in creating a sustainable impact.

The United Nations Institute for Training and Research (UNITAR), established in 1965 by a UN resolution, is an autonomous body enhancing UN effectiveness through training and research. It aims to develop the capacities of countries and UN stakeholders through quality learning solutions, supporting decision-making for global challenges.

USAID MEDICINES, TECHNOLOGIES, AND PHARMACEUTICAL SERVICES (MTaPS) PROGRAM
Improved Access. Improved Services. Better Health Outcomes.

The USAID Medicines, Technologies, and Pharmaceutical Services (MTaPS) Program enables low- and middle-income countries to strengthen their pharmaceutical systems, which is pivotal to higher-performing health systems. MTAps focuses on improving access to essential medical products and related services, and the appropriate use of medicines to ensure better health outcomes for all populations. The program is implemented by a consortium of global and local partners and led by Management Sciences for Health (MSH), a global health nonprofit.

Chemonics is one of the world's leading international development consulting firms with a presence in 95 countries. Its team of 5,000 specialists strives for excellence in development. It collaborates with clients, partners, and communities worldwide to address complex challenges through innovative solutions. Chemonics is committed to ensuring access to safe, effective, quality, and affordable essential medicines and vaccines for all. Its comprehensive supply chain services, ranging from procurement and logistics to health systems strengthening, are tailored to create sustainable health outcomes for the people we work with.

VillageReach is a non-profit global health innovator that develops, tests, implements and scales new solutions to critical health system challenges in low-resource environments, with an emphasis on strengthening the "last mile" of healthcare delivery. VillageReach combines expertise across public health, technology, and business to bring life-saving innovation – new systems, programs and technologies – to scale and sustainability in the world's most underserved communities.

People that Deliver (PtD) is a global partnership of organizations focusing on professionalization of supply chain personnel by advocating for a systematic approach to Human Resources (HR) for supply chain management (SCM) at the global and local level.
