About the Course

Empower School of Health is pleased to introduce the Post Graduate Diploma in Data Management in Public Health Procurement and Supply Chains. Designed for working professionals, this course provides the knowledge and skills needed to navigate data management challenges across public health procurement and supply chain systems, supporting better decision-making and health outcomes.

This Post Graduate Diploma is a 12-month online programme that has been developed in collaboration with the United Nations Institute for Training and Research (UNITAR) and other partners such as The Medicines, Technologies, and Pharmaceutical Services (MTaPS), Chemonics and VillageReach.

The course has been meticulously designed to provide a holistic understanding of the subject matter. It is also affordable and accessible, catering especially to the needs of low and middle-income countries.

A critical aspect addressed by the diploma is the lack of effective Data Management in the public health supply chain, a challenge and opportunity recognised globally. With data-driven decision-making being paramount for those seeking to excel in understanding data, its collection and analysis, and its usage to enhance public health supply chain efficiency, transparency, and effectiveness, this Post Graduate Diploma programme is indeed timely. The diploma equips participants with the knowledge to tackle these challenges head-on.

Embark on a transformative educational journey with us as we navigate through the evolving landscape of Data Management in public health procurement and supply chains operations.

INSTITUTIONAL
CERTIFICATION

Empower School of Health is proudly accredited by FIBAA for excellence in digital education, following European Standards and with over 25 years of expertise, FIBAA is recognised by Germany's Accreditation Council, Switzerland's HEdA, EQAR, and ENQA.

ACCREDITED

Empower is accredited by the Accreditation Service for International Schools, Colleges and Universities (ASIC). The Institution has earned Premier status with ASIC for its commendable areas of operation. ASIC is recognised by UKVI in the UK, is a member of the Council for Higher Education Accreditation (CHEA) International Quality Group (CIQG) in the USA and is listed in their International Directory, is a member of the BQF (British Quality Foundation) and is an institutional member of EDEN (European Distance and e-Learning Network).

About Us

Empower School of Health is a global health academic research and capacity-building institute dedicated to empowering individuals, institutions, and communities. With a diverse team of health professionals, designers, and technology experts, Empower School of Health has delivered impactful global health courses to learners from more than 40 countries and 250+ organisations, working alongside UN agencies, Ministries of Health, public health organisations, international NGOs, and donor agencies.

Established in 1965 by a UN resolution, the United Nations Institute for Training and Research (UNITAR) is an autonomous body dedicated to enhancing the effectiveness of the United Nations through training and research. As a key partner of Empower School of Health, UNITAR strengthens the learner experience by bringing institutional expertise, global perspectives, and practical relevance to the programmes. The partnership helps connect academic learning with real-world health and development contexts, while reinforcing a shared commitment to high-quality, inclusive education and strengthening the capabilities of professionals across health systems, government, and civil society.

Chemonics is one of the world’s leading international development consulting firms with a presence in 95 countries. Its team of 5,000 specialists strives for excellence in development. It collaborates with clients, partners, and communities worldwide to address complex challenges through innovative solutions. Chemonics is committed to ensuring access to safe, effective, quality, and affordable essential medicines and vaccines for all. Its comprehensive supply chain services, ranging from procurement and logistics to health systems strengthening, are tailored to create sustainable health outcomes for the people we work with.

VillageReach is a non-profit global health innovator that develops, tests, implements and scales new solutions to critical health system challenges in low-resource environments, with an emphasis on strengthening the “last mile” of healthcare delivery. VillageReach combines expertise across public health, technology, and business to bring life-saving innovation – new systems, programmes and technologies – to scale and sustainability in the world’s most underserved communities.

People that Deliver (PtD) is a global partnership of organisations focusing on the professionalisation of supply chain personnel by advocating for a systematic approach to Human Resources (HR) for supply chain management (SCM) at the global and local level.
