Procurement and Supply Chain Management for Medical Devices, Diagnostics and Equipments (MDDE)

Duration: 2 months online course

Course fees: USD 400 (exclusive of all taxes and bank charges)

Special price for group enrollments

This course is for health professionals in public health programs (development partners, government, NGOs, civil society, academia) and people interested to know how to successfully manage all types of health products in procurement and supply chain.

Course Overview

This course delves into the unique requirements of medical diagnostics, devices, and equipment, contrasting them with those of clinical diagnostics, laboratory supplies, pharmaceuticals, and health commodities. It emphasizes the vast scale of operations in terms of product volume and the resulting need for a fundamentally different approach to procurement management and supply chain management for products with very short shelf-life.

Course Contents

- Introduction to PSM of MDDE public health concepts and essential medical devices
- Procurement and supply chain management for MDDE: what is proven to work
- New health technologies
- Device selection and health technology assessments
- Quality assurance and health regulatory functions
- Waste disposal of medical devices, diagnostics and equipment

Course Includes

- Certificate from Empower
- Web-based training
- Self-paced learning
- Faculty with global experience
- Helpdesk and student support
- Aligned with global standards
- Quizzes and assessment
