

EMPOWER

SCHOOL OF HEALTH

2nd INTERNATIONAL WORKSHOP ON MONITORING AND EVALUATION OF GLOBAL HEALTH PROGRAMS

05th – 13th September, 2018

New Delhi, India

ABOUT THE COURSE

Monitoring and Evaluation (M&E) is a central competency that helps provide an evidence based resource allocation decisions and helps identify how challenges should be addressed and successes replicated. Its goal is to improve current and future management of outputs, outcomes and impact.

There is an urgent need to strengthen the performance of M&E at all levels and to improve the use of information in health sector decision making.

This workshop will provide participants with M&E tools and techniques needed for planning, organizing, and managing health programs and projects. The workshop will include the following modules:

Before the workshop, participants will complete an online foundation course in Monitoring and Evaluation which covers the basics of M&E. Throughout the course of the workshop, time will be allotted for practical exercises, group work and discussions around common M&E issues. Resources for further study and research in the M&E field will be provided.

During the final day of the workshop, participants will present their work and M&E plan for the project

COURSE TOPICS

KEY OBJECTIVES

The eight-day residential workshop on Monitoring and Evaluation of Global Health Programs will provide platform for state of the art tools and techniques. By the end of the workshop, participants will be able to:

- develop monitoring and evaluation plans by applying knowledge and skills gained throughout the workshop
- train professionals working in various health programs on basic concepts and practical approaches towards effective programmatic monitoring and evaluation
- discuss programmatic applications of the main tools and data systems used to monitor and evaluate health programs
- review the various evaluation designs and estimation techniques used for evaluating various health programs
- provide a platform for participants to share and learn from other country experiences to strengthen their M&E systems

TARGET GROUP

This workshop targets health professionals from different health programmes either at the national or provincial/ state as well as district level, development partners at national level; NGO and donor personnel responsible for oversight of health programs, especially in the areas of reporting, monitoring and evaluation.

Applicants should be proficient in English, have some involvement in developing M&E plans for their organization/project. Computer literacy and experience with data systems would be advantageous. Country teams are encouraged to apply.

KEY ADVISORS/SPEAKERS

Ms. Sangeeta Tikyani*: Director - Public Health, Empower School of Health. With more than 13 years of professional experience in the field of public health, her areas of expertise are M&E, Data Quality Assessment, Systematic Assessments and Reviews, Routine Health Information Systems, Health System Strengthening (HMIS, HRH, and Service Quality), Capacity Building, Gender Integration, QA/Improvement and Public Health Education. She has experience of conducting more than 20 M&E related international workshops in various countries including Bangladesh, Ethiopia, India, Namibia, Nepal & South Africa and also provided technical assistance in M&E in countries like Bangladesh, India and Nepal. She has been on various boards and chaired many technical committees including Capacity Building Committee of GEMNet- Health. Previously, she was heading M&E unit at Public Health Foundation of India and helped establishing Regional Centre of Reference in M&E.

Dr. Ruth Bessinger: An epidemiologist with more than 25 years of experience in M&E and applied research in HIV/AIDS and reproductive health. She has worked with various international agencies; US government agencies; non-governmental organizations and country governments. Being a former senior analyst with USAID's MEASURE Evaluation project, she coordinated and co-authored the UNAIDS document for monitoring and evaluating HIV-prevention programs; collaborated with institutions in four countries in South-east Asia to design and implement an approach to monitoring the implementation of a package of HIV prevention interventions; worked with governments in China, Uganda, and Senegal to strengthen their national HIV programs and also led a multi-country analysis of sexual behaviour and HIV in sub-Saharan Africa. She has designed curriculum and taught in short courses and master's degree courses aimed at increasing capacity for program M&E in Africa and Asia. Prior to this, she was an assistant professor at Tulane School of Public Health where she taught epidemiological methods and survey research methods.

Sr. Consultant*: His experience includes design and implementation of scientifically sound monitoring and evaluation system using individual tracking system, deployment of the M&E system at various levels, ensuring quality data collection, data management and analysis among others. He has rich experience in designing and implementing the Research Activities (includes designing methodology, sample selection, preparation of tools, training and supervising data collection for QA, analysis, and preparation of research briefs and conducting evaluation research) for a large-scale HIV/AIDS projects.

Chander Pal Thakur*: Consultant- Public Health, Empower School of Health. He is health management professional with additional training in Global Public Health and Human Resources for Health by Royal Tropical Institute, Netherlands. He is trained in M&E by MEASURE Evaluation, CPC at UNC. He has been involved in various national and international workshops in M&E and has designing and implementation experience of monitoring and evaluation systems, assessments, evaluations, health facility surveys and M&E plans for large scale projects. He has experience of developing and conducting online learning programs around M&E and was India coordinator for GEMNet-Health. His core area of work includes health systems strengthening, human resources for health, capacity building, and project management.

**faculty members are trained in Monitoring and Evaluation by MEASURE Evaluation from University of North Carolina at Chapel Hill, USA*

***international facilitators with rich experience of training in M&E, Impact Evaluation, Routine Health Information Systems will also be conducting sessions*

Our vision is to empower lives by promoting universal access to health and education. We work with health professionals from more than 50 countries to strengthen institutional capacity of global health programs. We also conduct assessments, research and provide advice to donors, governments and UN agencies on sourcing, logistics, pricing, quality, drug regulations, catalyzing local production and technology transfer. We offer intensive programmes (online, classroom and onsite) for participants/organizations seeking a more comprehensive understanding in a specific area of expertise.
