*Under discussions

ABOUT THE COURSE

TESTIMONIALS

“This training programme was a great experience for me. I got the opportunity to learn from many experts in WHO, UNDP and UNAIDS. This also gave me a platform to share my experiences PSCM with other countries and expand my knowledge of PSCM in a global perspective.”

Heng Kanha, Chief of Procurement Unit, MoH (Cambodia)

“Empower’s training on promoting access to medicine was a comprehensive training package enabling the staff responsible for PSM of medicines and medical equipment by building capacity in procurement and access to medicines. It was an excellent training and the choice of training venue gave us the opportunity to understand the functioning of various UN agencies based in Geneva.”

Kyaw Kan Kaung, Director, Ministry of Health (Myanmar)

“The study tour organized by Empower provided a great learning experience. The presentations by experts from leading organizations in the fight against HIV/AIDS, Malaria and TB (WHO, Global Fund, UNAIDS, IFRC, UNDP, Global Drug Facility, etc.) were inspiring and provided a refreshing approach reconciling PSM theory & practice. I had a lifetime opportunity to learn and network with the best.”

Roy Eusen, Procurement Associate, UNDP (Zimbabwe)

*All course feedback is from the 1st Workshop in Geneva – June 2016

 - Local transportation for field visits
- Does not include – International travel, airport transfers, food and accommodation

KEY TOPICS

- **Procurement** : Quantification of medicines & supplies; selection of most appropriate purchasing method; development of procurement plans, detailing product specifications, purchase conditions and quality assurance criteria for medicines and supplies
- **Supply Chain** : How countries and health programs can access the right quality product, in the right quantities, in the right condition, delivered to the right place, at the right time, and for a reasonable cost
- **Regulatory Affairs** : Premarket and post market regulatory activities, linkage with PSM, challenges and areas of capacity building
- **Quality Assurance** : Topics will be over medicines, diagnostics and vaccines and include pre-qualification, quality control, production and inspections and importance of documentation.

PLANNED FIELD VISITS & BRIEFINGS FROM*

- WHO** **World Health Organization (WHO)** has contributed to Thailand's national health development, for over 60 years. WHO has worked to strengthen the planning capacity of the Ministry of Public Health (MoPH) and supported innovative activities in strengthening primary health care and health systems, while contributing toward building institutional capacity in controlling communicable diseases, addressing risk factors for noncommunicable diseases and strengthening reproductive, maternal, and child care.
- MOPH** **Ministry of Public Health (MoPH)** of Thailand was established on 10 March 1942 and is considered to be one of the most advanced and well organized MoPH located in a single health campus. It is the main national health agency that plays important role in health programmes development and the improvement of health status of Thai people
- UNDP** **United Nations Development Programme (UNDP)** is the United Nations' global development network, headquartered in New York City. UNDP's partnership with the Global Fund is a crucial component for achieving the goals set out by Global Fund, wherein UNDP supports implementation by serving as temporary Principal Recipient (PR) of the Global Fund, developing the capacity of national entities and strengthening policy and programme quality of Global Fund related work.
- UNAIDS** **UNAIDS, the Joint United Nations Programme on HIV/AIDS**, is an innovative partnership of ten United Nations Organizations that leads and inspires the world in achieving universal access to HIV prevention, treatment, care and support. UNAIDS Visions is Zero new HIV infections. Zero discrimination. Zero AIDS-related deaths. It has five focus areas including: leadership and advocacy, strategic information and technical support, tracking monitoring and evaluation, civil society engagement and mobilization of resources.
- GPO** **Government Pharmaceutical Organization (GPO)** is a Thai state enterprise which manufactures pharmaceutical products in Thailand. GPO makes and sells four categories of products: medicines; antiretrovirals; chemicals/test kits/natural products; and preventive medicines. Besides Thailand, it markets its products in Nigeria, Ghana, Bhutan, Somalia, Myanmar, Sri Lanka, Malaysia, Cambodia, and Vietnam. The GPO gives Thailand significant leverage in its price negotiations with foreign drug suppliers

COLLABORATING PARTNERS

Empower School of Health's vision is to empower lives by promoting universal access to health and education. We work with health professionals from more than 30 countries to strengthen institutional capacity of global health programs. We also conduct assessments, research and provide advice to donors, governments and UN agencies on sourcing, logistics, pricing, quality, drug regulations, catalyzing local production and technology transfer. We offer intensive programmes (online, classroom and onsite) for participants/organizations seeking a more comprehensive understanding in a specific area of expertise.

Kent State University

Kent State University is one of the best universities in the state of Ohio, United States, and also has a global presence. The university has eight campuses in Ohio with the main campus in Kent being the largest. In addition to its US campuses, KSU also has presence in Florence (Italy), Geneva (Switzerland), Beijing (China), New Delhi (India) and over 60 study abroad locations. It also has cutting edge programs in public health and has over 2,14,000 alumni worldwide.

The People that Deliver Initiative (PtD) was established in 2011 as a global partnership of organizations focusing on professionalization of supply chain personnel by advocating for a systematic approach to HR for supply chain management. PtD envisions a world where health supply chain workforces are empowered and equipped to optimize health outcomes by improving access to health commodities.

IAPHL India Chapter, managed by Empower, promotes the IAPHL mission of supporting the professionalization of supply chain officers and managers in India and others working in the field of public health logistics and commodity security. The objective of this chapter is to promote the importance of "Supply Chain" in public health programs in India.
